

Dark Star Merch Badge Template

The **GREEN** corner crop marks on each template are used by us for alignment in our master template here and are the external markers for the print area. Do not move or edit these. The **MAGENTA**, **CYAN** and **ORANGE** area guide lines are where you should place your image. Make sure that all the important elements of your artwork are **WITHIN** the **BLUE** Print safe area, and designs with a full colour or image background should finish on or outside the **MAGENTA** cutting line.

1. **YOU MUST DELETE / TURN OFF THE MAGENTA, CYAN and ORANGE GUIDELINES layer (Layer 2) once you artwork has been placed here BEFORE you do a 'save as' the file to send to us.**
2. **Please save your file as .pdf or .jpg or transparent .png**
3. **Your finished file should only contain your artwork image and the GREEN corner crop marks - no magenta, blue or orange lines, or any of our text. You artwork program should allow you to do a 'save selected' option, or you can turn off layers 2 and 3.**
